

A detailed illustration of industrial machinery and equipment. In the background, a large industrial facility with cooling towers and smokestacks is visible. In the foreground, a yellow hard hat, a respirator, and various tools like wrenches, sockets, and a welding torch are scattered. A large conveyor belt system is shown in the center, with a blue electric motor and a red pump on the left. A yellow hard hat and a respirator are on the right. A large industrial valve is at the top right. A yellow hard hat and a respirator are on the right. A large industrial valve is at the top right. A yellow hard hat and a respirator are on the right. About Us

Established in January 2023, PT Daya Dinamis Industri (PT. DDI) is designed to run the business of procurement of spare parts and commissioning (EPC) for coal-fired power plants, supply of machinery, spare parts and related materials, as well as repair and operation and maintenance (O&M), technical consultation, training for power plant operators. And in the process, PT DDI also supplies food processing machinery, spare parts and related equipment.

We focus on product quality, supply reliability, and long-term partnerships with our clients.
